

I CLAIM:

1 1. A long-term urine-collection kit comprising:
2 a large-capacity can having a wide mouth;
3 a small-capacity cup having a rim dimensioned to sit in
4 the mouth; and
5 a removable cover fittable over the mouth of the can
6 when the cup is sitting in the mouth.

1 2. The urine-collection kit defined in claim 1 wherein
2 the cup is elastically deformable.

1 3. The urine-collection kit defined in claim 1 wherein
2 the can mouth and cup rim are of circular shape and the rim has
3 an outwardly projecting ridge that can sit atop the can mouth.

1 4. The urine-collection kit defined in claim 1,
2 further comprising
3 a closable specimen container inside the cup.

1 5. The urine-collection kit defined in claim 4 wherein
2 the specimen container has a threaded cap.

1 6. The urine-collection kit defined in claim 4 wherein
2 the cup has a removable cover over its rim, the specimen
3 container being inside the cup under the removable cover of the
4 cup.

1 7. The urine-collection kit defined in claim 6 wherein
2 the removable cover of the cup is a tear-off foil.

1 8. The urine-collection kit defined in claim 4,
2 further comprising
3 an openable bottle holding reagent inside the cup.

1 9. The urine-collection kit defined in claim 8 wherein
2 the specimen container has a threaded cap.

1 10. The urine-collection kit defined in claim 9
2 wherein the openable bottle is inside the specimen container.

1 11. The urine-collection kit defined in claim 9
2 wherein the openable bottle is secured to the threaded cap of the
3 specimen container.

1 12. The urine-collection kit defined in claim 1
2 wherein the can has a capacity of at least about 2 l.

1 13. The urine-collection kit defined in claim 12.
2 wherein the cup has a capacity of at least about 400 ml.
